NEW FACILITIES ANNOUNCEMENT HOLOGRAPHIC GRATING LABORATORIES

Ayer, Massachusetts, - 18 March 2002 —Optometrics LLC is pleased to announce the opening of its new Holographic Grating laboratories, complementing existing Ruling and Replication facilities. The company recently built two holographic laboratories, one for Research and Development and the second for production work. They are currently being used for the production of holographic wire grid polarizers and holographic master gratings for both spectroscopic as well as TELECOM applications.

The introduction of this facility complements Optometrics current product offerings and gives the company the ability to provide Holographic, Ruled, Replicated and Original Gratings for a range of applications including:

- Analytical Chemistry
- Life Sciences
- TELECOM Applications
- Physics
- Education
- Space Sciences

For more information, contact Optometrics at sales@optometrics.com. Optometrics can also be reached by telephone at (978) 772-1700 or fax at (978) 772-0017.

Optometrics LLC is a worldwide supplier of high quality optical components including gratings, lenses, filters, laser optics, monochromators and specialized optical systems and software. Optometrics' web address is: www.optometrics.com.
